To Plant this Fall

Plantings made in the fall will make good root growth to enable them to start off in early spring like veteran plants. September and October are excellent months to plant certain Hardy Perennials and Evergreens.

Dormant Roses and many other deciduous Shrubs and Trees are best planted from mid-October on through mid-December, depending on latitude.

Take advantage of setting out fresh plants this fall while new stocks are complete and there have more time to plant in mellow, workable ground. You'll enjoy the benefits next spring.

FLORIBUNDA ROSES

Plant these free-flowering, hardy varieties this fall for great masses of blooms in clusters all of next summer and fall. Good for both cutting and brilliant landscape effect. Use them informally in Rose beds, in permanent groups for color in the foreground of hardy shrub borders, for straight-line border or hedge planting instead of the common privet or barberry. Average growth to about 3 feet or more if desired; easily regulated by simple pruning.

Old-fashioned Roses

Every grown man and woman cherishes some memory of the fragrant, unsophisticated charm of the Roses of long ago. But regardless of their sentimental value, they have many sterling qualities, not the least of which is their old-Rose perfume, oft-times rare in modern Roses. Friends of Bobbink & Atkins have known for a long time of our sincere interest in Old-fashioned Roses, and we promise this interest shall never wane as the years roll on.

Planted in mixed shrubbery borders simulating old-fashioned gardens, they may be given a place apart from the Rose garden where they bloom among the wallflowers, the daffodils and the primroses, blending their fragrance with the lilies and pinks, and all the other delightful perennials. The true gardener realizes they seldom bloom much the first year, but like Lilacs, Philadelphus, Deutzia, Weigela, and other hardy shrubs they continue year after year with the least amount of care. They may be kept pruned back to about 3 feet if one wishes to enjoy the very finest blooms on Rose shrubs.

The CHRISTMAS ROSE

(*Helleborus niger*)

2-YEAR POTTED PLANTS

All Helleborus are grown by nurserymen from seeds. The general practice
is to offer bare-root plants grown from seedlings. It has been found,
however, that these bare-root plants are difficult to ship and transplant
successfully, so that many losses naturally occur. We have, therefore,
adopted a system of potting the choicest seedlings and growing them on
for another season. When setting out our strong plants, which are already
established in good, firm, ideal soil, you are sure to get more and better
blooms in much shorter time, because all shock and risk of transplanting is
eliminated. Our plants continue to go right on growing and will bloom
within a few months. Many have already flowered here in the Nursery.

Helleborus will thrive, bloom and look better when planted in groups
of three or more. Do not use strong fertilizers. A good garden soil,
well drained and with a small amount of leaf mold or peat moss worked
into it, will produce good results in a secluded location.

Most of our patrons receiving this Fall Folder already have their copy of the current issue of our complete 1950 catalogue entitled "GARDEN GEMS," wherein many more items are fully described and illustrated. This unusual catalogue holds for Fall as well as Spring, because practically all of the items may be transplanted this Fall just as successfully as in Spring. (The new issue of "GARDEN GEMS" will be available early in 1951.)

The Roses and other plants offered in this folder are especially selected from our many crops now maturing for Fall planting. Order them now with the assurance that only the very best, freshly dug, quality plants from our own nurseries will be used.

Bobbink & Atkins Roses in the New York Botanical Gardens

the Garden was first started in 1920. Visitors are always welcome.

To the thousands of Rose lovers who visit the New York Botanical Gardens in the Bronx, New York City, this small view of the Rose garden will revive memories of pleasant hours and a real atmosphere of Roses. Through the unflinching devotion of Mr. Bobbink to the Rose in America, we have donated practically all the Rose plants to this world-famous institution, where they are perfectly maintained by a capable staff. New and improved varieties are added yearly in addition to the older ones still in fine condition since

Acres of Roses

We grow hundreds of thousands of hardy garden Roses annually in New Jersey. Visitors to the fields this summer were impressed with the quality and size of the individual plants in bloom. September and October are especially good months to see the many classes of Roses, including Tree Roses, all blooming on our vast acreage near Clifton and Montclair. Enter the fields from either Broad St. or Grove St. on Chittenden Road. Visitors welcome at all times and, even though our attendants may not be there, you can see practically all of the varieties listed in this folder and then order by mail or telephone Rutherford 2-0700.

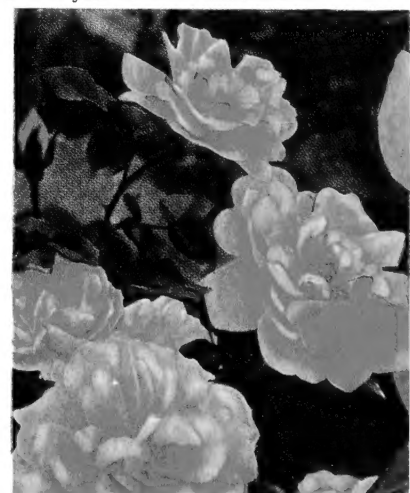

Our Rose display gardens and sales grounds are in East Rutherford at the Home Office, where Rose experts are always in attendance to help and advise you.

A Visit to Our Nursery Sales and Display Grounds and Greenhouses on Paterson Avenue in East Rutherford should prove to be pleasant, profitable and informative

Our enlarged Sales Grounds and New Field Office to better serve the many patrons in this great metropolitan area who make it a habit to motor to the Nursery for Quality Plants for Permanent Landscape Beauty.

● OUR LOCATION AND HOW TO REACH US ●

When motoring from the Oranges, Montclair, Nutley, Glen Ridge, Bloomfield, etc., take S-3 or Van Houten Avenue after leaving the Valley Road or Broad Street and cross the Passaic River to reach our home office and grounds on Paterson Avenue in East Rutherford. From Newark, take the River Road or Route 17.

Motoring from Englewood, Teaneck, Tenafly, Hackensack, Ridgewood, Saddle River, Paterson, etc., is very easy via main highways as mapped. Highway signs to Rutherford and East Rutherford, via Paterson Ave., are at all intersections.

From Westchester County, Connecticut, New York City, Long Island, etc., use the George Washington Bridge, Lincoln Tunnel, or Holland Tunnel via N. J. Route 3, S3, 6 or 17, as the case may be. Follow the East Rutherford highway signs, especially when leaving routes 6 or S3 before getting to Clifton and Passaic. We are about 9 miles from the Bridge or Tunnels.

Beautify and Improve Your Home Grounds

Most of us realize the importance of Landscape Beauty in relation to our Homes, our Streets, Municipal Parks, Memorial Parks, Institutions and Industrial Sites everywhere.

It is so very important to have the right tree, the right shrub and the right plant in the right place. We all get a big thrill when rearranging furniture and fixtures in our homes, and it seems an even greater thrill comes to those who rearrange their garden plantings from time to time. Sure enough, it takes some imagination to visualize the ultimate beauty and effect that one creates when planting suitable sizes. In all of these matters, our trained horticulturists are here to help you and to advise in detail what, when, and where to plant. We therefore invite you to come to the nursery to see the plants; most of them will be ready for you to take right along home during planting seasons from September to December.

SELECT YOUR OWN EVERGREEN TREES, ROSES AND SHRUBS

It is impossible to list all the plants we grow. The larger trees, specimen evergreens and shrubs that require transplanting with a large ball of earth, are mainly for local sales; it is obvious why it is not practical or economical to transport them any distance by rail.

Our "Balled and Burlapped" Evergreens ... large Broadleaf Evergreen and Deciduous Shrubs ... Rhododendrons and Azaleas ... large Fruit Trees ... Vines ... Perennials ... are usually ready for "Cash and Carry" sales at proper planting seasons. Well-informed salesmen are ready to assist you to make your garden a part of your home life. Our business is not only to produce good plants but to advise you how to use them. For the benefit of those who cannot visit us weekdays, we are open Sunday 9:00 to 4:30, during the planting seasons.
